Projects

End-to-End Placement Management System

- Designed the system to provide fast access to the placement procedures and related activities.
- Utilized technologies such as HTML, CSS, JavaScript, and PHP to build the system.
- Presented the system to the college's management team and received positive feedback.
- My Role in the project is to design the web pages and develop the home page.

Online Printing Service

- The Online Printing Service, allows users to order and receive printed documents at their doorstep, reducing the need for in-person visits to print shops during the COVID-19 pandemic.
- Implemented the website using HTML, CSS, JavaScript, and PHP technologies.
- My role in the project was designing the home page and developing the different pages.
- Developed skills in web development, project management, and client communication through this project.

Competition

ABU Robocon 2023

- Theme - Casting Flowers Over Angkor Wat,   Team name - Saarthak
- ABU Robocon 2023 is a robotics competition that challenges participants to design and build robots to complete specific tasks.
- I have experience working with motor drivers and Arduino microprocessors to obtain the rotation speed in the wheels of the throwing mechanism.
- Our team cleared the first stage of ABU Robocon 2023 with the 5th rank amongst 68 colleges.
